0. About UST

Identity & Core Values

Identity

UST is a graduate school that has given 32 GFRIs an educational function in order to cultivate future talents who will lead Korea's fields of science and technology.

The Purpose of UST Establishment

To cultivate practical and creative individuals who will lead the development of core and comprehensive technologies and the innovation of Industrial technologies by providing on-site experience and research activities on new interdisciplinary, converging technologies

The Legal Basis of UST Establishment

Article 33 (1) of the Act on the Establishment, Operation and Fostering of Government-Funded Science and Technology Research Institutes, etc.

Research institutes under this Act and the research institutes specified by Presidential Decree from among Government-funded research institutes incorporated pursuant to any Act other than this Act, may jointly found a graduate school university defined in Article 30 of the Higher Education Act (hereinafter referred to as "graduate school university") with authorization therefor from the Minister of Education in order to train human resources for research.

Core Value

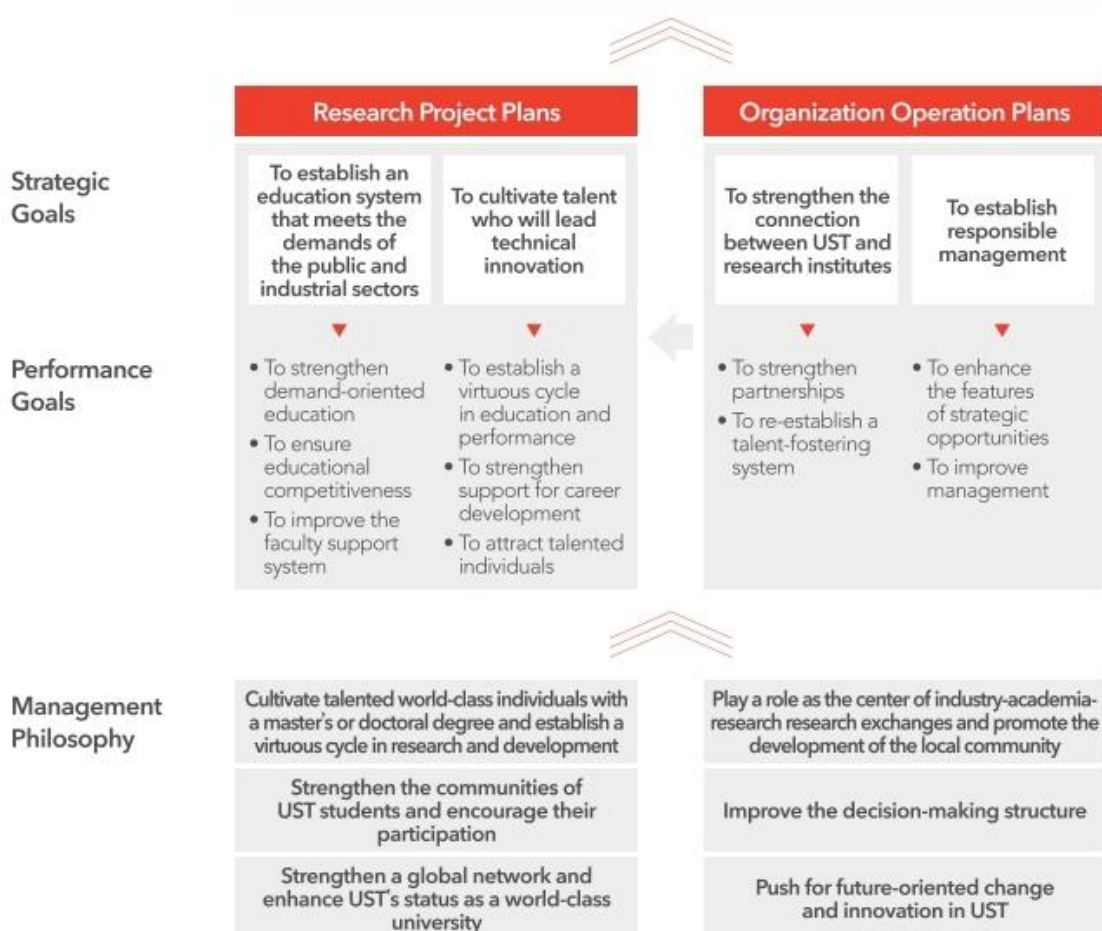

Mission & Vision

World-class science and technology graduate school

UST established Vision 2033 in order to become a better graduate school and create new future values.

Mission	To take the lead in cultivating experts in science and technology who create future values with national research institutes
Vision	To realize a national research institute-based graduate university that cultivates the future core talents
Management Goal	To establish a future-oriented model for graduate school education for the natural sciences and engineering by expanding the roles and duties of UST research institutes

UST has a systematic education system that will lead the future

UST's education system cultivates talented individuals who can resolve a variety of complicated issues in the most creative and efficient ways.

Multi-disciplinary convergence curriculum

UST has a differentiated education system encompassing basic education, education related to one's major, and specialized on-site education by campus. Students learn theoretical knowledge and develop their experience and expertise in research.

Field-oriented education

- Minimizes lectures and allows students to earn credits by participating in research in the field
- Operates Lab Rotation so that students can experience research in different fields by participating in research projects at other research institutes or private enterprises as well as those in their academic advisors' labs

Leadership training

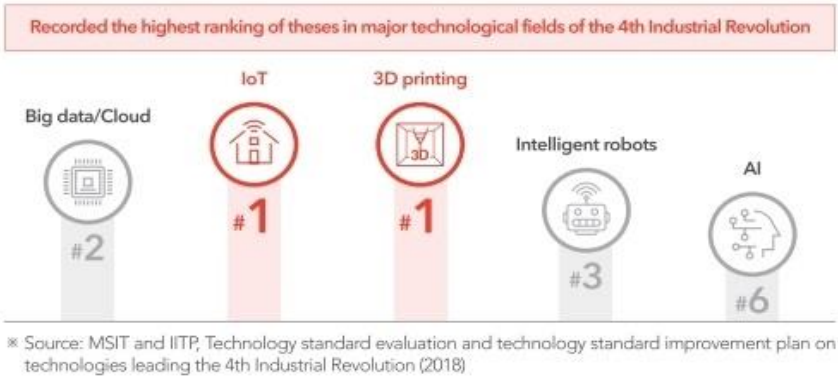

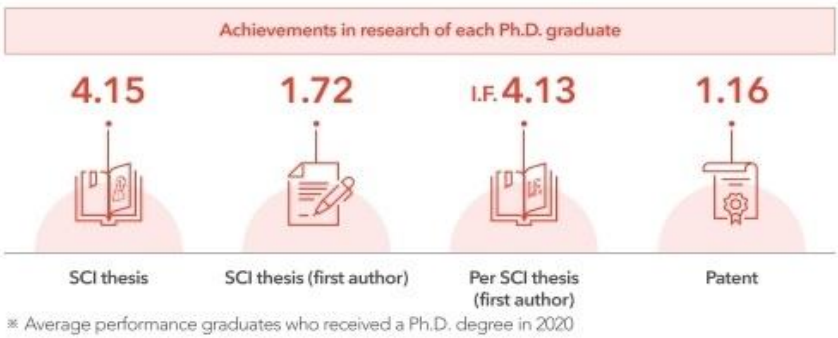

- Mandates students to take courses in liberal arts to develop the competencies required for research and viewing society

UST awakens your knowledge, competence, and limitless potential

UST is producing outstanding achievements in individual students with the goal of cultivating talented individuals required for the future society. UST helps students get a job and provides information on jobs based on its career support strategy.

Outstanding Achievements

Student Support & Welfare

UST operates a variety of student support and welfare programs so that students can focus on their studies and research

Student Welfare

Student group insurance

Compensates for accidents that happen during official school activities or in a lab during research activities for students' safety

Psychological Consultation

Provides counseling for students who agonize over studying, career paths, interpersonal relationships, etc.

Career support

UST helps students with their career choice throughout their life at school, including career direction setting and customized research guidance. UST's career support programs include BOSI (Brain Orientation Suitability Inventory) for new students, research guidance from an academic advisor, and online/offline job-seeking support.

Student Researcher Labor Contract

A student researcher labor contract is signed between a student researcher and his/her campus in order to protect his/her rights and interests and enhance a training environment in compliance with the government's policies.

UST Research Paper Award

Awards for excellent theses/dissertations

UST evaluates students' research competencies and academic papers and presents awards for outstanding research achievements. This award is only for academic papers that academic advisors and students work on together and were published as work by UST students.

UST Young Scientist Research Program

Provides research funds so that UST's doctoral students can develop their research competencies by themselves and grow as world-class researchers while handling the entire R&D project process

Monthly Student Labor Cost

Master's program

At least
KRW 1,200,000

*Equivalent to USD 1,100

Doctoral program

At least
KRW 1,600,000

*Equivalent to USD 1,450

Overseas Training Program

Overseas Training Program

Support for students' participation in overseas research projects such as joint research, visiting research, and internships at a renowned overseas universities or research institutes in order to develop their research competencies and build an international research network

International Presentation Support Program

Support for students' participation in international academic conferences held in domestic and international so that they can share their academic and research achievements

Korean language course for International Students

Provides international students who have difficulty studying or taking courses in Korean with Korean language courses, cultural and educational adaptation courses, and globalization courses through exchanges with Korean students

Campuses At a Glance

UST with 32 campuses

Through Field-oriented education, UST cultivates creative convergence experts who will lead the future by developing students' competencies required for becoming experts in science and technology.

UST Alumni

Alumnus Chairul Hudaya

Career Ph.D. in Energy & Environment Technology, KIST(2016), Current President of Sumbawa University of Technology in Indonesia

When Hudaya studied in South Korea, he generally studied Li-ion batteries and energy storage systems. He won the President's Award, Daejeon Mayor's Award, and KIST Paper Award at the graduation ceremony of 2016. In addition, he won the ASEAN Young Scientist and Technologist Award in 2017. In 2020, he was appointed the President of Sumbawa University of Technology in Indonesia.

The greatest lesson I learned at UST was 'Appreciation'

UST, the Only Chance and the Best Experience

Alumnus Muhammad Imran

Career Ph.D. in Energy System Engineering, KIER(2016), Current Professor at Aston University in UK

UST will serve you the best experience and best opportunity. It's the only chance to hone your expertise as a researcher. I must say that you make full use of UST as a resource. Also, have confidence that you can do it; set a positive and realistic goal.

I loved everything that UST offered

Alumnus Yashwardhan Radhamoran Malpani

Career Ph.D. in Medicinal & Pharmaceutical Chemistry, KRICT(2013), Current Project Leader in Daewoong Bio Inc. in South Korea.

There were still a lot of programs for students and I made good memories.

In particular, Field Exchange Program gave me a chance to learn about Material Chemistry. It was one of the best opportunities I had studying at UST. Sometimes we need to learn other fields of study and at UST I had a chance to do it. That knowledge I gained is still useful today.

I . Overall

UST helps student researchers engage in self-directed learning by identifying and solving problems themselves on-site while conducting research rather than asking them to passively receive theory-centered education delivered in a traditional fashion. UST looks forward to receiving applications from the most ambitious and creative up-and-coming scientists to pursue their dreams in a program built upon UST's educational philosophy. We ask that you submit your applications according to the timeline and guidelines listed here.
